

FARM LANDS
J. S. Martin

THE CHRONICLE

J. S. Martin
REAL ESTATE

VOL. III. NO. 27.

CROSSFIELD, ALBERTA, FRIDAY, JULY 1 1910.

PRICE \$1 A YEAR.

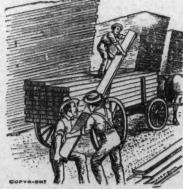

DAVE is recognized as an authority on Dress.

The sun in his twenty-four hours journey shines on no better clothes than we turn out.

See Dave. Get a hat from Dave that will not fade.

D. G. HARVIE

CROSSFIELD LUMBER YARD

Going
to
Build?

Then come in and talk over your plans with us. We will be pleased to furnish you an estimate on anything you may need in our line. Remember we have one of the largest and best stocks of lumber on the line and our prices are right.

CROSSFIELD LUMBER YARD

W. STUART & CO., PROPRIETORS

GEO. BECKER, MANAGER

With right prices, right terms, right goods,
you cannot fail to do right by buying the right article
at the right time.

Our Buggy stock is right, the roads are right, the season of the year is right; when in town call and do right.

Our new Deering Binder is right, having all the appealing features of the old and a great many new ones; it will pay you to see it before placing your order.

What are the four points to be considered in buying a binder? It has them and is **Second to None** and is sold by

MCKAY BROS.

The Silver Creek Lumber Co.

(Successors to the MacDonald & McNaughton Lumber Co.)

Have a million feet of lumber for sale at very low prices, made up of

Shiplap, Drop-siding, Lap-siding, Flooring, Window and Door Casing, Dimension and Rough Lumber. Write for price list or come and see our stock. Wagon boxes made to order, at a low figure.

Terms Cash. P. O. address, Cremona, Alta. Accommodation for man and beast pay.

U. S. Still Encroaching

Ottawa, June 30—Canada's claim to exclusive jurisdiction of Hudson's Bay as being wholly Canadian territory has been challenged by the United States government and the question may come up for arbitration at The Hague. The owners and masters of American trading vessels in Hudson's Bay have been notified from Washington that it is unnecessary to take out Canadian licenses and other dues hitherto demanded by Canada, as the United States government no longer recognizes the bay as an inland sea under the exclusive Canadian jurisdiction. So far American traders have recognized Canadian authority, but the first refusal will bring the issue to a head. The principle at stake is with regard to the fisheries rights. The result of the present case at The Hague re North Atlantic fisheries will largely determine the issue, as the point involved respecting the interpretation of the three mile limit of jurisdiction out from the coast applies also to the Hudson's Straits.

Canada's contention is that the three mile limit is from headland to headland, and does not follow the sinuosities of the coast.

A reason for the recent appointment of Hon. J. C. Patterson to be a commissioner to investigate the titles of ownership to lands in the far north may be found in a report which has reached Ottawa to the effect that the United States government has given instructions to its citizens who are engaged in the whaling industry in the northern waters to disregard Canada's claims to sovereignty there. So far the United States whalers have been willingly paying license to the Royal Northwest Mounted Police on behalf of the Canadian government, and it was understood that they had accepted the claim of Canada to control over the northern fisheries. Now however it is said that the whalers who left New Bedford this week for the north, take with them a definite statement from Washington that they will be protected by the United States government if they refuse to pay the license or recognize the sovereignty of Great Britain in the northern seas.

The Annual Training Camp

On Saturday last the Crossfield members of the 15th Light Horse returned from Calgary. They report a very successful training camp.

Major Boyle of Crossfield was in command of the second largest squadron in camp. In the tactical field day on the Sarcee Reserve this squadron was given the decision by the umpires over the Edmonton squadron.

The squadron was also highly complimented on its shooting, and the boys all earned extra pay for excellence in this. Ben Marley and Marion Edwards of Crossfield earned the limit, 50 cents per day extra

Major Boyle reports himself very much pleased with his entire squadron, and says the Crossfield boys fully held their own.

Night Train Well Patronized

Calgary, June 29.—The success of the tri-weekly night service between Calgary and Strathcona up to the present has been exceeding the expectations of the C.P.R. officials, and it is understood that providing the traffic is maintained at the present rate for the next few weeks the service will be made daily instead of tri-weekly.

And if it is definitely decided that this night train will be run regularly after the June trial, Mr. G. F. Armstrong, an official of the post office department at Ottawa, who passed through Calgary last Friday, said that he would be inclined to consider the matter favorably, but of course, there would have to be sufficient mail between the north and south to warrant such action.

In the Supreme Court of Alberta Judicial District of Calgary

Between ONTAKES & ARMSTRONG, Plaintiffs, and Harvey Sower and Willard Graham, Defendants.

In Chambers, Wednesday, the 22nd day

of June, 1910.

Upon the application of the Plaintiffs, upon hearing the Solicitor for the applicant, and upon reading the affidavit of Charles W. Moore filed.

It is ordered that service on the Defendant Harvey Sower of the Writ of Summons and Statement of Claim and Injunction Order in this action by publishing this Order together with the Notice herein endorsed once a week for three weeks preceding the 22nd day of July 1910 in the *Crossfield Chronicle*, a newspaper published at Crossfield, and also publishing the same in the *Calgary Daily Herald* and *Calgary Standard*, and serving the same to the last known address of the Plaintiff Harvey Sower. Harvey Sower a copy of the Writ of Summons, Statement of Claim, Injunction Order and a copy of this order, be deemed good and sufficient service of the said Writ and Statement of Claim and Injunction Order on the said Defendant Harvey Sower.

And it is further ordered that the said Defendant Harvey Sower do enter an appearance and file his statement of defence to the said Writ of Summons at the office of the Clerk of this Court in the City of Calgary on or before the 22nd day of August 1910.

And it is further ordered that the costs of this application be costs in the cause.

D. L. SCOTT, J. S. C.

NOTICE

This action is brought to recover from the Defendant Harvey Sower the sum of \$485.80 for goods sold and delivered to him by the Plaintiffs.

Provincial Exhibition

The closing of the entries for the Provincial Exhibition, to be held at Calgary, June 30th to July 7th, reveals a very large increase over last year.

There are 431 entries of cattle as against 256 last year, 775 entries of horses as against 616 last year, 288 entries of sheep and swine as against 177 last year, agricultural products 169 as against 45 last year. The percentage of increase in the above entries is as follows: Cattle 68.36, horses 25.89, sheep and swine 68.71, agricultural products 375.5. These figures do not include any championship entries.

It will be noticed that the increase is very large in each department. In the acre yield competition there are 44 entries. This will undoubtedly be one of the most interesting agricultural features ever seen at an exhibition.

A large list of rooms has been secured from all over the city to assist the hotels in providing accommodation for exhibition visitors. Everything points to the exhibition being a grand success.

CANADIAN PACIFIC RAILWAY

NEW TRI-WEEKLY NIGHT TRAIN

CALGARY AND STRATHCONA

Commencing June 6 1910

READ DOWN	READ UP
Mon., Wed., Fri.	Tue., Thur., Sat.
24.55 Lv. Calgary Ar. 8.10

STANDARD SLEEPERS AND FIRST CLASS COACHES

ONTAKES & ARMSTRONG.

Serpent's Tongues, from Adam to William Watson

By Charlotte C. West

WATSON'S unseemly poem, that set two English-speaking nations by the ears, and caused more tongues to wag than any bit of feminine scandal ever could—upon what occasion has been asked, in his idea of "The Woman with the Serpent's Tongue" based?

What suggested the serpent? It was a snake which was barbed with poison-shafts, and which had given glances of alarm to all their intended victims, and returned like instruments of torture, to turn and slay.

Watson was unquestionably full of venom when he conceived the lines, else he might have been in some pains to invent a reason for the serpent's attack.

He was probably right in his suspicion that the serpent was the author of all ill-fortune.

But, although there is no superstition in all folk-lore, savage as well as civilized,

more deeply rooted than that of the snakes, there is nothing which remains more obscure; at the same time there is nothing in all folk-lore directly associating the serpent with ill-fortune.

For the obvious reason that in every legend, allegory, and story, the serpent is referred to in the masculine gender, and is always the friend of the serpent-worship known as Obeahism.

In the ancient Canaan language, the word "ob" means "to inflate," and the word "ob" also means "serpent" from the serpent's peculiarity of inflation; this "mysterious power" being ascribed to the presence of the Divine Spirit.

The serpent, the Ophidion, or Ob, or Python, received the names of ob, or Python, according to the not unusual custom of the priestly priestesses of any deity they served.

In this connection the degeneration of women and the meaning of things is easily understood. The word "Endor" is called "Ob" (high priestess or Python)—snake or serpent-worshipper); and the English name for the serpent is "bag and bone," a perfect relationship to the word "hak," the ancient British name for a species of snake. (In Yiddish, snakes are still called *hak*—big worms.)

Going back to the very beginning of time, the serpent figures conspicuously and always has done so in the traditions and superstitions beliefs of the ancients, although, to be sure, these beliefs were mystic in character and highly primitive.

To them the serpent was analogous with the Wise One, and represented the most perfect symbol of Deity, to whom deities were even more often than any initiatory site, and every mystery.

It was, therefore, sacred to ancient races, and still is revered by the Druids, who still sacrifice to it.

Just what part the serpent played in the history of the early Egyptians is lost in vast antiquity, but that its role was important is evident from the fact that it is the symbol of the Nile.

From the "Hagia Sophia," the fascinating "Cleopatra," purporting to be a literal translation from the papyrus of Harpalus, we learn that Cleopatra, the Queen, who makes the statement: "Before she died, in the reign of Ptolemy Auletes, who is called the Piner, so she took a golden urnans, the snake symbol of our royalty of Egypt, from a coffer of ivory, and cast it in my breast."

All will know that Cleopatra was himself a traitor to his sacred vows, forgetting all and losing all under the spell of Cleopatra's wondrous beauty, the avowed betrayer of her royal trust, in his death-agony bursts out with:

"Oh, Cleopatra, thou Destroyer! Still must I curse thy beauty!"

Cleopatra is referred to as "the Serpent of the Nile," and also as "the Aphrodite of the Nile."

As far as the nature of the serpent in Egyptian mythology is born in mind, as well as Cleopatra's choice of a death-weapon, the apes probably being regarded as the most interesting, all reference to Cleopatra and her son assumes a totally different significance from that by which they are usually characterized.

In ancient Indian, their serpents were worshipped because a symbol of royalty, and, in Greek mythology, played a most interesting role, being assimilated, as far as the divine art of healing. Asclepius, the healer of medicine, was always represented with a staff entwined by a snake, which represented the divine medical profession to the present day.

According to the New Platonic School at Alexandria, the serpents partly represented astuteness and partly rejuvenescence; they also signified soothsaying;

as by eating snakes the result of various diseases was healed. According to others, they represented the watchfulness and wisdom of the physician, or a sign of health, as they became young again by changing their skin.

In Egypt, where the Temple of Asclepius was located, harmless snakes were said to abound, and to have snakes sent into some of the mystery schools of the healing art, that they placed among the patients, their bodies acting much in the same capacity as our cold-water coils of today, and their tongues acting as a sort of thermometer, certain eruptions and like.

In this connection the story of St. Bartholomew is interesting, and the popular cult to Asclepius for aid is extremely interesting.

It is said that the reason was immediately given him, in the form of a serpent gliding from the vessel when it reached the banks of the Tiber, when the pest immediately lifted. To do him justice, he immediately went to Asclepius, on the site of which now stands the Hospital of St. Bartholomew.

Then it will be noticed that partly from the idea of divinity attached to it, and partly because they cast their slough periodically, the serpent came to be only a symbol of health at reproduction, but a means of procuring these blessings.

Pliny, Galen, and the ancients are unanimous as to the medicinal properties of the snake when eaten, and the effect seems to have obtained—even in modern times, for in the letters of Mme. de Sevigne we find an order for ten days to two to take every evening in stuffing in a fowl; and directions are given for packing the aforesaid vipers.

Sir Kenneth Digby used to go with the famous Venetian Stanley, upon capons fatened with the flesh of vipers.

Those who ate serpent flesh were also supposed to acquire the gift of understanding the languages of the brute creation. One is reminded here of the wonderful use Wagner made of the "ring of the Nibelung."

Siegfried, when slaying the dragon, also regarded as the serpent of the old, old days as a great secret, interpreted the taste of its blood, and immediately empowered to interpret the language of the birds. In India, great store is set upon the heart and liver of vipers.

Kampfer says the Japanese soldiers ate the flesh of the serpents called futas, believing firmly that it had the virtue of making the bold and courageous.

In Russia and India is esteemed as a remedy for bad eyes.

Besides being used medicinally and as a charm, some nations use serpents as food.

The Amazons, according to Hector John French, were a nation of women who were greatly esteemed the flesh of serpents as the natives of Surinam do not eat them.

The evil character of the serpent and its sinister influence upon woman dates only from Christian mythology, but the serpent was a tempter to Eve, who was tempted, so it is said, to temptation which has occupied the minds of countless scholars, and it is generally conceded that the origin of the Eastern and Western religions is due to the Eastern serpent.

As we see it, the serpent was a woman with the ancient Oriental's conception of the malignant characteristics of his Satanic majesty.

Therefore, the origin of creation is, after all, not so far removed from his brother Adam, who, according to Marie Corradi, I believe, hid behind Eve, when she was tempted and me I did eat."

It is worthy of note, that prior to the Christian era, not only the serpent, but the woman's tongue with the poisonous fangs of the serpent. A doggerel published in 1600, and attributed to one George Whyley, Goostly—

ought doubtless rescue this question from further obscurity.

Tradition and Christian literature have given the serpent's tongue an undeserved reputation.

As one writer states, "the slender, white serpent which has been invented by popular imagination with a stinging and poisonous bite, is quite harmless, and serves chiefly as a food."

Therefore it will not surprise us to learn that we must come down to more modern and more civilized times for the origin of the serpent's tongue.

As one writer states, "the slender, white serpent which has been invented by popular imagination with a stinging and poisonous bite, is quite harmless, and serves chiefly as a food."

Therefore it will not surprise us to learn that we must come down to more modern and more civilized times for the origin of the serpent's tongue.

tion: F. H. SCHOOLEY,
Editor.

FRIDAY, JULY 1, 1910.

Prince Frederich of Prussia, is mar-
ried to a princess nearly three years
his senior.

It is hoped in Potsdam circles that
when King George and Queen Mary
make their first official visit to Ger-
many, they will be accompanied by the
Prince of Wales, and that the latter
may have an agreeable oppor-
tunity of making the acquaintance
of his fair third cousin, which may
some day ripen into affection.

The number of European princes
who the Kaiser and Kaiserin con-
sider eligible for their daughter's
hand, is rather limited. Those who
are generally looked upon as most
eligible are Roman Catholic, like
the King of Portugal and one of the
young Austrian archdukes.

The Kaiserin, who is very deeply
attached to her daughter, has in ac-
cordance with her own principles,
brought her up as an uncompromising
Protestant, and would rather see her
married to one of the most ob-
scure princes than share a throne
with a Roman Catholic king. The
marriage with the future King of
England would suggest political ad-
vantages of far reaching effect.

Close dynastic ties between Eng-
land and Germany have, of course,
not been able to prevent strained
relations and bad blood between the
two countries, but it is believed in
Germany that if the Kaiser's daugh-
ter should become Great Britain's
future king's consort, the danger of
Anglo-German hostilities would be-

come remote to the vanishing point.
King George ranks here as a first-
class Germanophobe and doubts
are entertained as to whether he
could be persuaded to consider an
alliance between his heir and the
Kaiser's daughter.

The Manitoba elections have been
called for July 11. The fight, as
usual is strenuous. The chances for
Manitoba going Liberal are just
about as good as the chances for
British Columbia to go Liberal, or
for Alberta to go Conservative. In
other words the Conservatives have
practically a dead cinch on Manito-
ba for this time.

If the Liberal newspapers might
be believed during the past week,
the Conservative candidates in Ver-
million and Medicine Hat were sure
to lose their deposits. On the other
hand, if the Conservative newspa-
pers were accredited the Liberals
were just as sure to lose their depo-
sits in both ridings. Such is politi-
cal campaigning.

The Alberta bye-elections are over
and the expected has happened.
Premier Sifton carried Vermilion
riding by a majority variously esti-
mated at from 228 to 300. After-
General Mitchell carried Medi-
cine Hat by about 450. Both ma-
jorities are smaller than the Liber-
als polled in the last election in
these ridings. Therefore the Liber-
als can claim a complete victory and
vindication because their candidates
were returned, and the Conserva-
tives can claim victory and lack of
confidence because the majorities
were smaller—and everybody's hap-
py accordingly.

Matrimonial Rumor

Berlin, June 27.—There are in-
teresting rumors in circulation in
military and social quarters at Pots-
dam to the effect that the Kaiser
and Kaiserin are thinking of a mat-
rimonial alliance between their only
daughter, Princess Victoria Louise,
of Prussia, and the eldest son of the
King and Queen of England, who
became Prince of Wales this week.

The princess, who will be 18 next
September, is one year and three-
quarters older than the Prince of
Wales, but that would not be re-
garded as a handicap from her par-
ents' point of view. The Kaiser's
wife is several months older than
the Emperor, and their second son,

Prince Frederich of Prussia, is mar-
ried to a princess nearly three years
his senior.

It is hoped in Potsdam circles that
when King George and Queen Mary
make their first official visit to Ger-
many, they will be accompanied by the
Prince of Wales, and that the latter
may have an agreeable oppor-
tunity of making the acquaintance
of his fair third cousin, which may
some day ripen into affection.

The number of European princes
who the Kaiser and Kaiserin con-
sider eligible for their daughter's
hand, is rather limited. Those who
are generally looked upon as most
eligible are Roman Catholic, like
the King of Portugal and one of the
young Austrian archdukes.

The Kaiserin, who is very deeply
attached to her daughter, has in ac-
cordance with her own principles,
brought her up as an uncompromising
Protestant, and would rather see her
married to one of the most ob-
scure princes than share a throne
with a Roman Catholic king. The
marriage with the future King of
England would suggest political ad-
vantages of far reaching effect.

Close dynastic ties between Eng-
land and Germany have, of course,
not been able to prevent strained
relations and bad blood between the
two countries, but it is believed in
Germany that if the Kaiser's daugh-
ter should become Great Britain's
future king's consort, the danger of
Anglo-German hostilities would be-

come remote to the vanishing point.
King George ranks here as a first-
class Germanophobe and doubts
are entertained as to whether he
could be persuaded to consider an
alliance between his heir and the
Kaiser's daughter.

Making Good Farm Soil

Montreal Witness: What can be done
with poor soil is illustrated in the case of
Sandringham. King Edward had all an
Englishman's fondness for country life,
and he had ample means to pursue
"intensive" farming. Sandringham
stands amid a country which in the space
of less than a century has been rescued
from worthlessness, and brought to a high—indeed the highest point of culti-
vation. Years ago, an agricultural
authority wrote on the estate as a very
barren soil, but not, I apprehend, in-
capable of cultivation." His apprehension
has proved to be correct, for the same
land today forms one of the richest
farms in the whole country, with the
finest and best-kept gardens to be seen
anywhere. Sandringham, indeed, is
quoted as an example of how farming
carried out upon lavish lines can be made
profitable. Mr. Rider Haggard, who is
himself a practical farmer, wrote some
years ago of Sandringham that it was "a
model which might be imitated with advantage
to themselves and the country by
all who are sufficiently persevering,
wealthy and intelligent to do so." The
point most worthy of note for us is that we
have many thousands of acres now
deserted for fresh fields which capital and
intelligence will some day reclaim and
make abundantly productive. And even
now, our worn-out farms on which men
are dragging out an existence could be
easily restored to profitable production.
The time is not far off when there will
be very little useless land. It is men
like King Edward, with the will and the
means to experiment, who have changed
so many of our ideas in this respect.

And now, since Hudson's Bay gives
promise of developing commercial value,
Uncle Sam's fingers have begun to take
on a terrible itching to possess it.

Council Meetings

The council of the Village of Crossfield will meet in the hall known as the Bishop Hall on the first Tuesday of each alternate month, commencing with February at 7 p.m.

By Order of the Village Council
F. J. McAnalphy, Chairman.

Public Notice

This is to notify the owners of cows within the village that if the said cows are kept closed up at night, to prevent them from becoming a nuisance, the council will be obliged to enforce the Pound law.

By Order of Village Council
Chas. Hultgren, Sec-Treas.

AROUND THE TOWN

Jas. Chisholm went to Banff Saturday night for a ten days' stay.

Miss DeLong left Thursday to spend the summer at her home in Calgary.

Mrs. Rickman, of Didsbury, is here visiting her daughter Mrs. W. O. Levagood.

If you want to either buy or sell a farm, see J. S. Martin, the man who sells land.

Dr. and Mrs. Bishop returned Wednesday evening from an extended visit in the States.

W. J. Kelly will go north the first of the week for a visit with relatives, and expects to spend part of his vacation in travel.

Mrs. R. E. Bishop and daughter Kathleen left Wednesday for a few days visit with relatives at High River.

Mrs. J. C. Downs is prepared to take pupils on piano, organ, guitar and mandolin. Her announcement appears in another column.

The Murton Realty Co., with Geo Murton in charge, are opening a real estate office on Railway avenue, next door to the bakery.

R. Reid has taken his fine two year old Percheron stallion to the provincial fair. We look for this horse to be a winner in his class.

Crossfield went in strong for a "same First" this year. No tetanus, no arms blown off, no eyes knocked out, in the wake of our celebration.

School closed this week for the summer holidays. The trustees have engaged Miss DeLong and Mr. Kelly to teach for the ensuing year.

All applications for Government Health Insurance will receive prompt attention by applying to G. W. Boyce. Office one door south of "Chronicle."

A rattling good game of baseball was played Thursday evening on the Crossfield diamond, between Airdrie and Crossfield. The home team won 6 to 4.

The pupils of Crossfield school accompanied by teachers and a considerable number of parents, had a picnic at the grove north of town last Saturday. All report a good time.

Rev. W. G. W. Fortune, B. D., general secretary of the Temperance and Moral Reform League, will visit Crossfield on Sunday, July 10. He will speak in the Methodist church at 3:30 and 7:30 p.m. The subject will be "A Study in Profit and Loss."

The rain Tuesday evening rather spoiled the Presbyterian lawn social. The air cooled off to the point where it took the edge off one's appetite for ice cream. However, considering the weather, the attendance was good and all showed a disposition to make the best of it.

Money to loan on improved farms, no commission, no delay, you get the money in a few days. See Hulgren & Davie.

Provincial Exams.

School examinations in Standards V and VI have been held in Crossfield this week, conducted by Mr. Magee, principal of the Strathcona schools.

The following pupils in Standard V took the examinations: Guy Armstrong, Myrl Armstrong, Eileen McAnalphy, Mary McAnalphy, Maggie McBean, of Crossfield school; Frank Rudy, Annie Rudy, of Floral school.

Standard VI examinations were taken by Edna Colling and Caroline O'Neil, of O'Neil school.

Local News

Crossfield is considerably in evidence at the Calgary fair. Stooke & Amery have eleven head of pure bred Percherons at the exhibition. — The Pioneer Real Estate Firm, Hulgren & Davie, has the listing of the best land around Crossfield, close in, and on crop payments, at reasonable prices. Some good bargains for cash. Don't forget the name—Hulgren & Davie.

For Western Canada's Great Industrial Fair at Winnipeg, Man., July 13 to 23, 1910, the Canadian Pacific Railway Company will have in effect special rates. For full particulars as to rates, limits, etc., apply to nearest Canadian Pacific Ticket Agent.

A short time ago, in his work around the stable, Mr. C. W. Wicks received a slight injury to one hand. The wound did not occasion much inconvenience at first, but after a time it became inflamed and it was soon apparent that blood poison had set in. Thursday he was taken to the hospital at Calgary for treatment. A speedy recovery is hoped for.

Many Crossfield people are taking in the big fair at Calgary. A crowd went down on the early morning train on the 1st. Quite a number went on the regular trains the previous day to stay throughout the fair, and several have gone by team. The largest attendance from here however will be on Monday the 4th, as it is generally considered that this will be the biggest and best day.

Another Rush to Alaska

Seattle Post Intelligencer: Save during the period immediately after the announcement of the great discoveries of gold on the Klondike had excited the attention of the whole world, there has never been such a rush to the northern gold fields as is taking place this year with the opening of navigation. The first steamships going north have been loaded with passengers to the extreme limit allowed by law, and practically all of the space on the earlier steamers has been taken. It is the present estimate that during the month of June not less than 15,000 passengers will leave Seattle for Alaska. The opening of new districts is responsible.

The Toathsome Skunk

Champaign, Ill., June 29.—The much maligned skunk has a defender in the person of Prof. Frank E. Wood of the Illinois state laboratory of natural history, who declares the animal is good to eat as well as being otherwise useful.

That the flesh of the much dreaded beast is white, tender and of a delicious flavor if the scents glands are removed is the assertion of the savant.

Prof. Wood gives no recipe for the capture of the animal, and does not tell just how one is to be enabled to enjoy the meat.

"No animal is more unjustly persecuted than the skunk," asserts Prof. Wood. "It is the best friend the farmer has, destroying enormous quantities of grubs, beetles, grasshoppers, mice, and moles."

—How is this for a bargain? \$600.00 will handle 160 acres, three miles from Crossfield at only 20.00 per acre and long terms on balance. Call on Hulgren & Davie for sample like this.

Flavored With Fido

One summer day three painters were painting the inside of a house in the country. Towards tea time these painters began to wish for something to drink. So they held a conference, with the result that their leader went to the mistress of the house and said:

"The frames of your oil paintings are very dingy, ma'am. We'll clean them for you if you've got any whisky."

"How much whisky will be needed?" asked the guileless old lady.

"About a quart, ma'am," said the painter.

The old lady brought to the three painters a quart of whisky, and they drank it up, and cleaned the picture frames with water.

At sunset the old lady, coming to inspect the frames, expressed herself as delighted with them.

"Oh!" she said, "they look beautiful. And who'd have thought a quart of whisky would clean so many? It was lucky I saved it. It was what I washed Fido in last Sunday."

President Diaz of Mexico was re-elected by an enormous majority. His opponent was in prison at the time. Diaz received 98 per cent. of the votes and his opponent got 2 per cent. of them. As Diaz did the counting of the votes the interesting question now is, How did his opponent get as many votes as he did?
